Volume contents

Volume 151 (2005)

Regular articles

Comparison of injuries caused by the pistols Tokarev, Makarov and Glock 19 at firing distances of 10, 15 and 25 cm
D. Lepik and V. Vasiliev (Estonia) 1–10

Alcohol and drugs in drivers fatally injured in traffic accidents in Sweden during the years 2000–2002
P. Holmgren, A. Holmgren and J. Ahlner (Sweden) 11–17

The articular surfaces of the hindfoot: sex assessment of prehistoric New Zealand Polynesian skeletal remains
A.M.C. Murphy (Australia) 19–22

Widmark factors for local Chinese in Hong Kong. A statistical determination on the effects of various physiological factors
T.W.M. Tam, C.T. Yang, W.K. Fung and V.K.K. Mok (China) 23–29

STR-genotyping from human medieval tooth and bone samples
F.-X. Ricaut, C. Keyser-Tracqui, E. Crubézy and B. Ludes (France) 31–35

Estimating the probability of identity in a random dog population using 15 highly polymorphic canine STR markers
C. Eichmann, B. Berger, M. Steinlechner and W. Parson (Austria) 37–44

Individualization of tiger by using microsatellites
Y.C. Xu, B. Li, W.S. Li, S.Y. Bai, Y. Jin, X.P. Li, M.B. Gu, S.Y. Jing and W. Zhang (PR China) 45–51

Underground pill testing, down under
A.M. Camilleri and D. Caldicott (Australia) 53–58

On human STR sub-population structure
D.J. Rowold and R.J. Herrera (USA) 59–69

Shaken baby syndrome: A biomechanics analysis of injury mechanisms
F.A. Bandak (USA) 71–79

The risk of body packing: a case of a fatal cocaine overdose
S.A. Koehler, S. Ladham, L. Rozin, A. Shakir, B. Omalu, J. Dominick and C.H. Wecht (USA) 81–84

Announcements of population data

Y-chromosome haplotype analysis in Antioquia (Colombia)
A.A. Gaviria, A.A. Ibarra, O.D. Palacio, Y.C. Posada, O. Triana, L.M. Ochoa, M.A. Acosta, M. Brión, M.V. Lareu and A. Carracedo (Colombia, Spain) 85–91

Polymorphism of four X-chromosomal STRs in a Polish population sample
W. Pepinski, M. Skawronska, A. Niemcunowicz-Janica, E. Koc-Zorawska, J. Janica and I. Soltyszewski (Poland) 93–95

STR data for 15 loci in a population sample from the central region of Mexico
S. Hernández-Gutiérrez, P. Hernández-Franco, S. Martínez-Tripp, M. Ramos-Kuri and H. Rangel-Villalobos (Mexico) 97–100

doi:10.1016/S0379-0738(05)00281-1

Letters to the Editor

Paternity index calculations when some individuals share common ancestry
K.L. Ayres and D.J. Balding (UK) 101–103

Identification of a bronze weapon based on an embedded fragment in a 3000-year-old skull
K. Kurosaki, L. Wang, J. Tang, W. Wang, N. Saitou, T. Endo and S. Ueda (Japan, China) 105–108

Erratum

Erratum to "Validation of a male-specific, 12-locus fluorescent short tandem repeat (STR) multiplex" [Forensic Sci. Int. 148 (1) (2005) 1–14]
B.E. Krenke, L. Viculis, M.L. Richard, M. Prinz, S.C. Milne, C. Ladd, A.M. Gross, T. Gornall, J.R.H. Frappier, A.J. Eisenberg, C. Barna, X.G. Aranda, M.S. Adamowicz and B. Budowle (USA, Canada) 109

"Validation of a male-specific, 12-locus fluorescent short tandem repeat (STR) multiplex" [Forensic Sci. Int. 148 (1) (2005) 1–14]
B.E. Krenke, L. Viculis, M.L. Richard, M. Prinz, S.C. Milne, C. Ladd, A.M. Gross, T. Gornall, J.R.H. Frappier, A.J. Eisenberg, C. Barna, X.G. Aranda, M.S. Adamowicz and B. Budowle (USA, Canada) 111–124

Dairy of future events ..... I–IV

Regular articles

A quantitative differentiation method for acrylic fibers by infrared spectroscopy
V. Causin, C. Marega, S. Schiavone and A. Marigo (Italy) 125–131

Neuropathology of human immunodeficiency virus infection: A forensic autopsy study in Dar Es Salaam, Tanzania
P.M. Ng'walali, K. Kibayashi, M.P. Mbonde, S. Harada, D. Mwakagile, J.N. Kitinya and S. Tsunenari (Tanzania, Japan) 133–138

Is there recent progress in the estimation of the postmortem interval by means of thanatochemistry?
B. Madea (Germany) 139–149

Fatal traffic injuries among pedestrians, bicyclists and motor vehicle occupants
K. Törő, M. Hubay, P. Sótonyi and E. Keller (Hungary) 151–156

Postmortem diagnostics using MSCT and MRI of a lethal streptococcus group A infection at infancy: A case report
C. Jackowski, S. Dirnhofer, M. Thali, E. Aghayev, R. Dirnhofer and M. Sonnenschein (Switzerland) 157–163

Quantification of propane in biological materials by head-space GC
J. Park, J.-S. Min, S. Heo, M.-A. Lim and S.-W. Park (Republic of Korea) 165–170

The concentrations, appearance and taste of nine sedating drugs dissolved in four different beverages
V. Olsen, I. Gustavsen, J.G. Bramness, I. Hasvold, R. Karinen, A.S. Christophersen and J. Mørland (Norway) 171–175

Evaluation of non-metric variation in the crania of black and white perinates
S.M. Weinberg, D.A. Putz, M.P. Mooney and M.I. Siegel (USA) 177–185

What can a baby's skull withstand? Testing the skull's resistance on an anatomical preparation
P. Holck (Norway) 187–191

Ultramicroscopic observations on morphological changes in hair during 25 years of weathering
B.S. Chang, W.S. Hong, E. Lee, S.M. Yeo, I.S. Bang, Y.H. Chung, D.S. Lim, G.H. Mun, J. Kim, S.O. Park and D.H. Shin (Republic of Korea) 193–200

A case of commingled remains from rural South Africa
E.N. L'Abbé (South Africa) 201–206

Burial location using cheap and reliable quantitative probe measurements
A. Ruffell (UK) 207–211

Victim of a dictatorial regime: Identification of Mr. Roberto Gomensoro Josman
M.Y. İşcan, H.E. Solla and B.Q. McCabe (Turkey, Uruguay) 213–220

Turf wars: Authority and responsibility for the investigation of mass graves
M. Skinner and J. Sterenberg (Canada, UK) 221–232

Evaluation of a novel tagging and tissue preservation system for potential use in forensic sample collection
M. Grassberger, C. Stein, S. Hanslik and M. Hochmeister (Austria) 233–237

Development of a genetic traceability test in pig based on single nucleotide polymorphism detection
F. Goffaux, B. China, L. Dams, A. Clinquart and G. Daube (Belgium) 239–247

Use of the genomic matching technique to complement multiplex STR profiling reduces DNA profiling costs in high volume crimes and intelligence led screens
R. Laird, R.L. Dawkins and S. Gaudieri (Australia) 249–257
Social isolation and delayed discovery of bodies in houses: The value of forensic pathology, anthropology, odontology and entomology in the medico-legal investigation
M.S. Archer, R.B. Bassed, C.A. Briggs and M.J. Lynch (Australia) 259–265
Analysis of wrapped or cased object by a hand-held X-ray fluorescence spectrometer
H. Ida and J. Kawai (Japan) 267–272

Case reports
Massive acute arsenic poisonings
T. Lech and F. Trela (Poland) 273–277
Muti murders form South Africa: A case report
M. Steyn (South Africa) 279–287

Short communication
The presence of gamma-hydroxybutyric acid (GHB) and gamma-butyrolactone (GBL) in alcoholic and non-alcoholic beverages
S. Elliott and V. Burgess (UK) 289–292

Announcement of population data
Population data for the AmpF*ℓ* STR® Identifiler™ PCR Amplification Kit in China Han in Jilin Province, China
B. Yang, G. Wang, Y. Liu and W. Yang (China) 293–297
Haplotype diversity in mitochondrial DNA hypervariable region I, II and III in a Korean ethnic group from northeast China
Y. Zhang, Q. Xu, H. Cui, Y. Cui, H. Lin, K. Kim and J. Lee (PR China, South Korea) 299–301
Allele frequencies of the ACTBP2 (=SE33), D18S51, D8S1132, D12S391, D2S1360, D3S1744, D5S2500, D7S1517, D10S2325 and D21S2055 loci in a German population sample
D. Schmid, K. Anslinger and B. Rolf (Germany) 303–305
Population data of Y-STR minimal haplotypes in a sample of Caucasian-Mestizo and African descent individuals of Colombia
J.J. Yunis, L.E. Acevedo, D.S. Campo and E.J. Yunis (Colombia) 307–313
Population data on 14 STR loci from population of Serbia and Montenegro (new and renewed data)
D. Keckarević, D. Savić, M. Keckarević, M. Stevanović, A. Tarasjev, B. Čuljković, A. Đarmati, S. Vukosavić and S. Romac (Serbia and Montenegro) 315–316
Y-chromosome STR haplotypes in Somalis
C. Hallenberg, B. Simonsen, J. Sanchez and N. Morling (Denmark) 317–321

Dairy of future events ..... I–IV
Volume contents ..... V–VII
Author index ..... IX–X

ELSEVIER

Forensic Science International 151 (2005) XI–XVII

Forensic Science International

www.elsevier.com/locate/forsciint

Subject index

Volume 151 (2005)

Acceleration/Deceleration; Injury, Infant, Shaken, Baby, Rotational, Syndrome, Neck **151**, 71

Acquired immunodeficiency syndrome; Human immunodeficiency virus, Neuropathology, Forensic autopsy, Tanzania **151**, 133

Acrylics; Forensic science, Fibers, Copolymers, Polyacrylonitrile, Infrared spectroscopy, X-ray diffraction, Crystallinity **151**, 125

Africa; Sorting techniques, Taphonomy, Forensic case, Skeletal remains **151**, 201

Alcohol pharmacokinetics; Blood alcohol concentration (BAC), Hip-flask defence, Peak BAC, Widmark formula **151**, 23

Alcohol; Forensic toxicology, Driving, Traffic accident, Drugs **151**, 11

Allele frequencies; Forensics, Genotyping, STR, Population differences **151**, 315

Allele frequencies; STR, Forensic, Mexico **151**, 97

Alloy; X-ray fluorescence, Hand-held spectrometer, Shield, Thickness, Metal, Poison **151**, 267

AmpFℓ STR® Identifiler™; STR, Jilin, China Han population **151**, 293

Anatomy; Forensic anthropology, Child abuse, Skull trauma, Fractures, Fall experiments **151**, 187

Ancient DNA; Tooth, PCR inhibitors, STR megaplex typing **151**, 31

Anthropology; Mass graves, Forensic expertise, Crime scene management, Archaeology, Pathology, Odontology **151**, 221

Anthropology; Ritual, Medicine, Osteology **151**, 279

Archaeology; Mass graves, Forensic expertise, Crime scene management, Anthropology, Pathology, Odontology **151**, 221

Arsenic; Massive poisoning, Post-mortem findings, Tissue concentrations **151**, 273

Articular surfaces; Talus, Calcaneus, New Zealand Polynesians, Discriminant analysis, Sex assessment **151**, 19

Baby; Injury, Infant, Shaken, Rotational, Acceleration/Deceleration, Syndrome, Neck **151**, 71

Beverages; Gamma-hydroxybutyric acid, Gamma-butyrolactone **151**, 289

Block matching; Genomic matching technique, Genomic blocks, DNA profiling, Intelligence led screens, High volume crime **151**, 249

Blood alcohol concentration (BAC); Alcohol pharmacokinetics, Hip-flask defence, Peak BAC, Widmark formula **151**, 23

Blood; Propane, Head-space GC, Partition coefficient, SPME **151**, 165

Body packers; Mules, Cocaine, Death **151**, 81

Calcaneus; Articular surfaces, Talus, New Zealand Polynesians, Discriminant analysis, Sex assessment **151**, 19

Canine microsatellites; Multiplexes, Informative contents, Forensic **151**, 37

Capillary electrophoresis; Estimation of the time since death, Postmortem chemistry, Potassium, Hypoxanthine, Vitreous humor, Immunohistochemistry, DNA degradation, Magnetic resonance spectroscopy **151**, 139

Child abuse; Forensic anthropology, Skull trauma, Fractures, Fall experiments, Anatomy **151**, 187

China Han population; STR, AmpFℓ STR® Identifiler™, Jilin **151**, 293

Cloth and skin injuries; Gunshot wounds, Firing distance **151**, 1

doi:10.1016/S0379-0738(05)00284-7

Cocaine; Body packers, Mules, Death **151**, 81

CODIS; Forensic marker systems, Forensic database, Sub-population structure, STRs **151**, 59

Colombia; Y chromosome, STR, Haplotypes, Forensic genetics, Population genetics **151**, 307

Colombia; Y-chromosome, Short tandem repeats, Population data **151**, 85

Computed tomography; Forensic science, Forensic radiology, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Magnetic resonance imaging, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Control region; Mitochondrial DNA, Hypervariable region, Korean ethnic group **151**, 299

Copolymers; Forensic science, Fibers, Acrylics, Polyacrylonitrile, Infrared spectroscopy, X-ray diffraction, Crystallinity **151**, 125

Cortex; Hair, Electron microscope, Weathering, Cuticle, Medulla **151**, 193

Craniofacial morphology; Forensic fetal osteology, Non-metric variation, Racial identification, Logistic regression **151**, 177

Crime scene management; Mass graves, Forensic expertise, Archaeology, Anthropology, Pathology, Odontology **151**, 221

Crystallinity; Forensic science, Fibers, Copolymers, Acrylics, Polyacrylonitrile, Infrared spectroscopy, X-ray diffraction **151**, 125

Cuticle; Hair, Electron microscope, Weathering, Cortex, Medulla **151**, 193

Death; Body packers, Mules, Cocaine **151**, 81

Digital video superimposition; Forensic sciences, Forensic anthropology, Skull, Human identification, Roberto Gomensoro Josman, Photo-skull comparison, DNA test, Uruguayan dictatorial regime **151**, 213

Disaster identification; DNA analysis, Tissue preservation, Typifix™ **151**, 233

Discriminant analysis; Articular surfaces, Talus, Calcaneus, New Zealand Polynesians, Sex assessment **151**, 19

DNA analysis; Tissue preservation, Disaster identification, Typifix™ **151**, 233

DNA degradation; Estimation of the time since death, Postmortem chemistry, Potassium, Hypoxanthine, Vitreous humor, Immunohistochemistry, Magnetic resonance spectroscopy, Capillary electrophoresis **151**, 139

DNA profiling; Genomic matching technique, Genomic blocks, Intelligence led screens, High volume crime, Block matching **151**, 249

DNA test; Forensic sciences, Forensic anthropology, Skull, Human identification, Roberto Gomensoro Josman, Photo-skull comparison, Digital video superimposition, Uruguayan dictatorial regime **151**, 213

DNA typing; Forensic science, Short tandem repeat (STR), Y chromosome, Polymerase chain reaction (PCR), Validation, PowerPlex, European minimal haplotype **151**, 111

Douglas Owsley; Probe, Soil density, Geoscience, Forensic, Remote sensing **151**, 207

Drivers; Road accidents, Pedestrians, Trauma **151**, 151

Driving; Forensic toxicology, Traffic accident, Alcohol, Drugs **151**, 11

Drugs; Forensic toxicology, Driving, Traffic accident, Alcohol **151**, 11

Ecstasy; Ketamine, Pills, Pill-testing kits, Spot-test reagents, Rave **151**, 53

Electron microscope; Hair, Weathering, Cuticle, Cortex, Medulla **151**, 193

Estimation of the time since death; Postmortem chemistry, Potassium, Hypoxanthine, Vitreous humor, Immunohistochemistry, DNA degradation, Magnetic resonance spectroscopy, Capillary electrophoresis **151**, 139

European minimal haplotype; Forensic science, DNA typing, Short tandem repeat (STR), Y chromosome, Polymerase chain reaction (PCR), Validation, PowerPlex **151**, 111

Fall experiments; Forensic anthropology, Child abuse, Skull trauma, Fractures, Anatomy **151**, 187

Fibers; Forensic science, Copolymers, Acrylics, Polyacrylonitrile, Infrared spectroscopy, X-ray diffraction, Crystallinity **151**, 125

Firing distance; Gunshot wounds, Cloth and skin injuries **151**, 1

Forensic anthropology; Child abuse, Skull trauma, Fractures, Fall experiments, Anatomy **151**, 187

Forensic anthropology; Forensic sciences, Skull, Human identification, Roberto Gomensoro Josman, Photo-skull comparison, Digital video superimposition, DNA test, Uruguayan dictatorial regime **151**, 213

Forensic anthropology; Skeleton, Social isolation, Forensic pathology, Forensic odontology, Forensic entomology, Multidisciplinary **151**, 259

Forensic autopsy; Human immunodeficiency virus, Acquired immunodeficiency syndrome, Neuropathology, Tanzania **151**, 133

Forensic case; Sorting techniques, Taphonomy, Africa, Skeletal remains **151**, 201

Forensic database; Forensic marker systems, Sub-population structure, STRs, CODIS **151**, 59

Forensic entomology; Skeleton, Social isolation, Forensic pathology, Forensic anthropology, Forensic odontology, Multidisciplinary **151**, 259

Forensic expertise; Mass graves, Crime scene management, Archaeology, Anthropology, Pathology, Odontology **151**, 221

Forensic fetal osteology; Non-metric variation, Craniofacial morphology, Racial identification, Logistic regression **151**, 177

Forensic genetics; X-chromosome STRs, Poland, Population genetics **151**, 93

Forensic genetics; Y chromosome, STR, Haplotypes, Colombia, Population genetics **151**, 307

Forensic marker systems; Forensic database, Sub-population structure, STRs, CODIS **151**, 59

Forensic odontology; Skeleton, Social isolation, Forensic pathology, Forensic anthropology, Forensic entomology, Multidisciplinary **151**, 259

Forensic pathology; Skeleton, Social isolation, Forensic anthropology, Forensic odontology, Forensic entomology, Multidisciplinary **151**, 259

Forensic radiology; Forensic science, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Forensic science; DNA typing, Short tandem repeat (STR), Y chromosome, Polymerase chain reaction (PCR), Validation, PowerPlex, European minimal haplotype **151**, 111

Forensic science; Fibers, Copolymers, Acrylics, Polyacrylonitrile, Infrared spectroscopy, X-ray diffraction, Crystallinity **151**, 125

Forensic science; Forensic radiology, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Forensic sciences; Forensic anthropology, Skull, Human identification, Roberto Gomensoro Josman, Photo-skull comparison, Digital video superimposition, DNA test, Uruguayan dictatorial regime **151**, 213

Forensic toxicology; Driving, Traffic accident, Alcohol, Drugs **151**, 11

Forensic; Canine microsatellites, Multiplexes, Informative contents **151**, 37

Forensic; Probe, Douglas Owsley, Soil density, Geoscience, Remote sensing **151**, 207

Forensic; STR, Allele frequencies, Mexico **151**, 97

Forensics; Genotyping, STR, Allele frequencies, Population differences **151**, 315

Fractures; Forensic anthropology, Child abuse, Skull trauma, Fall experiments, Anatomy **151**, 187

Gamma-butyrolactone; Gamma-hydroxybutyric acid, Beverages **151**, 289

Gamma-hydroxybutyric acid; Gamma-butyrolactone, Beverages **151**, 289

Genetic polymorphisms; Short tandem repeats, German population **151**, 303

Genomic blocks; Genomic matching technique, DNA profiling, Intelligence led screens, High volume crime, Block matching **151**, 249

Genomic matching technique; Genomic blocks, DNA profiling, Intelligence led screens, High volume crime, Block matching **151**, 249

Genotyping; Forensics, STR, Allele frequencies, Population differences **151**, 315

Geoscience; Probe, Douglas Owsley, Soil density, Forensic, Remote sensing **151**, 207

German population; Short tandem repeats, Genetic polymorphisms **151**, 303

Gunshot wounds; Firing distance, Cloth and skin injuries **151**, 1

Hair; Electron microscope, Weathering, Cuticle, Cortex, Medulla **151**, 193

Hand-held spectrometer; X-ray fluorescence, Shield, Thickness, Metal, Alloy, Poison **151**, 267

Haplotype; Y-chromosome STR, Population genetics, Somali **151**, 317

Haplotypes; Y chromosome, STR, Colombia, Forensic genetics, Population genetics **151**, 307

Head-space GC; Propane, Blood, Partition coefficient, SPME **151**, 165

High volume crime; Genomic matching technique, Genomic blocks, DNA profiling, Intelligence led screens, Block matching **151**, 249

Hip-flask defence; Alcohol pharmacokinetics, Blood alcohol concentration (BAC), Peak BAC, Widmark formula **151**, 23

Human identification; Forensic sciences, Forensic anthropology, Skull, Roberto Gomensoro Josman, Photo-skull comparison, Digital video superimposition, DNA test, Uruguayan dictatorial regime **151**, 213

Human immunodeficiency virus; Acquired immunodeficiency syndrome, Neuropathology, Forensic autopsy, Tanzania **151**, 133

Hypervariable region; Mitochondrial DNA, Control region, Korean ethnic group **151**, 299

Hypoxanthine; Estimation of the time since death, Postmortem chemistry, Potassium, Vitreous humor, Immunohistochemistry, DNA degradation, Magnetic resonance spectroscopy, Capillary electrophoresis **151**, 139

Imaging autopsy; Forensic science, Forensic radiology, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Pneumonia, Streptococcus **151**, 157

Immunohistochemistry; Estimation of the time since death, Postmortem chemistry, Potassium, Hypoxanthine, Vitreous humor, DNA degradation, Magnetic resonance spectroscopy, Capillary electrophoresis **151**, 139

Individualization; Microsatellite, Tiger, *Panthera tigris* **151**, 45

Infant; Injury, Shaken, Baby, Rotational, Acceleration/Deceleration, Syndrome, Neck **151**, 71

Informative contents; Canine microsatellites, Multiplexes, Forensic **151**, 37

Infrared spectroscopy; Forensic science, Fibers, Copolymers, Acrylics, Polyacrylonitrile, X-ray diffraction, Crystallinity **151**, 125

Injury; Infant, Shaken, Baby, Rotational, Acceleration/Deceleration, Syndrome, Neck **151**, 71

Intelligence led screens; Genomic matching technique, Genomic blocks, DNA profiling, High volume crime, Block matching **151**, 249

Jilin; STR, AmpF*ℓ* STR® Identifiler™, China Han population **151**, 293

Ketamine; Ecstasy, Pills, Pill-testing kits, Spot-test reagents, Rave **151**, 53

Korean ethnic group; Mitochondrial DNA, Control region, Hypervariable region **151**, 299

Logistic regression; Forensic fetal osteology, Non-metric variation, Craniofacial morphology, Racial identification **151**, 177

Magnetic resonance imaging; Forensic science, Forensic radiology, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Computed tomography, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Magnetic resonance spectroscopy; Estimation of the time since death, Postmortem chemistry, Potassium, Hypoxanthine, Vitreous humor, Immunohistochemistry, DNA degradation, Capillary electrophoresis **151**, 139

Mass graves; Forensic expertise, Crime scene management, Archaeology, Anthropology, Pathology, Odontology **151**, 221

Massive poisoning; Arsenic, Post-mortem findings, Tissue concentrations **151**, 273

Medicine; Ritual, Osteology, Anthropology **151**, 279

Medulla; Hair, Electron microscope, Weathering, Cuticle, Cortex **151**, 193

Metal; X-ray fluorescence, Hand-held spectrometer, Shield, Thickness, Alloy, Poison **151**, 267

Mexico; STR, Allele frequencies, Forensic **151**, 97

Microsatellite; Tiger, *Panthera tigris*, Individualization **151**, 45

Mitochondrial DNA; Control region, Hypervariable region, Korean ethnic group **151**, 299

Mules; Body packers, Cocaine, Death **151**, 81

Multidisciplinary; Skeleton, Social isolation, Forensic pathology, Forensic anthropology, Forensic odontology, Forensic entomology **151**, 259

Multiplexes; Canine microsatellites, Informative contents, Forensic **151**, 37

Neck; Injury, Infant, Shaken, Baby, Rotational, Acceleration/Deceleration, Syndrome **151**, 71

Neuropathology; Human immunodeficiency virus, Acquired immunodeficiency syndrome, Forensic autopsy, Tanzania **151**, 133

New Zealand Polynesians; Articular surfaces, Talus, Calcaneus, Discriminant analysis, Sex assessment **151**, 19

Non-invasive autopsy; Forensic science, Forensic radiology, Virtopsy®, Virtual autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Non-metric variation; Forensic fetal osteology, Craniofacial morphology, Racial identification, Logistic regression **151**, 177

Odontology; Mass graves, Forensic expertise, Crime scene management, Archaeology, Anthropology, Pathology **151**, 221

Osteology; Ritual, Medicine, Anthropology **151**, 279

Panthera tigris; Microsatellite, Tiger, Individualization **151**, 45

Partition coefficient; Propane, Head-space GC, Blood, SPME **151**, 165

Pathology; Mass graves, Forensic expertise, Crime scene management, Archaeology, Anthropology, Odontology **151**, 221

PCR inhibitors; Ancient DNA, Tooth, STR megaplex typing **151**, 31

Peak BAC; Alcohol pharmacokinetics, Blood alcohol concentration (BAC), Hip-flask defence, Widmark formula **151**, 23

Pedestrians; Road accidents, Drivers, Trauma **151**, 151

Photo-skull comparison; Forensic sciences, Forensic anthropology, Skull, Human identification, Roberto Gomensoro Josman, Digital video superimposition, DNA test, Uruguayan dictatorial regime **151**, 213

Pig; Single nucleotide polymorphism, Traceability **151**, 239

Pills; Ecstasy, Ketamine, Pill-testing kits, Spot-test reagents, Rave **151**, 53

Pill-testing kits; Ecstasy, Ketamine, Pills, Spot-test reagents, Rave **151**, 53

Pneumonia; Forensic science, Forensic radiology, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Streptococcus **151**, 157

Poison; X-ray fluorescence, Hand-held spectrometer, Shield, Thickness, Metal, Alloy **151**, 267

Poland; X-chromosome STRs, Forensic genetics, Population genetics **151**, 93

Polyacrylonitrile; Forensic science, Fibers, Copolymers, Acrylics, Infrared spectroscopy, X-ray diffraction, Crystallinity **151**, 125

Polymerase chain reaction (PCR); Forensic science, DNA typing, Short tandem repeat (STR), Y chromosome, Validation, PowerPlex, European minimal haplotype **151**, 111

Population data; Y-chromosome, Short tandem repeats, Colombia **151**, 85

Population differences; Forensics, Genotyping, STR, Allele frequencies **151**, 315

Population genetics; X-chromosome STRs, Poland, Forensic genetics **151**, 93

Population genetics; Y chromosome, STR, Haplotypes, Colombia, Forensic genetics **151**, 307

Population genetics; Y-chromosome STR, Haplotype, Somali **151**, 317

Postmortem chemistry; Estimation of the time since death, Potassium, Hypoxanthine, Vitreous humor, Immunohistochemistry, DNA degradation, Magnetic resonance spectroscopy, Capillary electrophoresis **151**, 139

Post-mortem findings; Arsenic, Massive poisoning, Tissue concentrations **151**, 273

Postmortem imaging; Forensic science, Forensic radiology, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Potassium; Estimation of the time since death, Postmortem chemistry, Hypoxanthine, Vitreous humor, Immunohistochemistry, DNA degradation, Magnetic resonance spectroscopy, Capillary electrophoresis **151**, 139

PowerPlex; Forensic science, DNA typing, Short tandem repeat (STR), Y chromosome, Polymerase chain reaction (PCR), Validation, European minimal haplotype **151**, 111

Probe; Douglas Owsley, Soil density, Geoscience, Forensic, Remote sensing **151**, 207

Propane; Head-space GC, Blood, Partition coefficient, SPME **151**, 165

Racial identification; Forensic fetal osteology, Non-metric variation, Craniofacial morphology, Logistic regression **151**, 177

Rave; Ecstasy, Ketamine, Pills, Pill-testing kits, Spot-test reagents **151**, 53

Remote sensing; Probe, Douglas Owsley, Soil density, Geoscience, Forensic **151**, 207

Ritual; Medicine, Osteology, Anthropology **151**, 279

Road accidents; Pedestrians, Drivers, Trauma **151**, 151

Roberto Gomensoro Josman; Forensic sciences, Forensic anthropology, Skull, Human identification, Photo-skull comparison, Digital video superimposition, DNA test, Uruguayan dictatorial regime **151**, 213

Rotational; Injury, Infant, Shaken, Baby, Acceleration/Deceleration, Syndrome, Neck **151**, 71

Sedating drugs; Solubility in beverages **151**, 171

Sex assessment; Articular surfaces, Talus, Calcaneus, New Zealand Polynesians, Discriminant analysis **151**, 19

Shaken; Injury, Infant, Baby, Rotational, Acceleration/Deceleration, Syndrome, Neck **151**, 71

Shield; X-ray fluorescence, Hand-held spectrometer, Thickness, Metal, Alloy, Poison **151**, 267

Short tandem repeat (STR); Forensic science, DNA typing, Y chromosome, Polymerase chain reaction (PCR), Validation, PowerPlex, European minimal haplotype **151**, 111

Short tandem repeats; German population, Genetic polymorphisms **151**, 303

Short tandem repeats; Y-chromosome, Population data, Colombia **151**, 85

Single nucleotide polymorphism; Pig, Traceability **151**, 239

Skeletal remains; Sorting techniques, Taphonomy, Forensic case, Africa **151**, 201

Skeleton; Social isolation, Forensic pathology, Forensic anthropology, Forensic odontology, Forensic entomology, Multidisciplinary **151**, 259

Skull trauma; Forensic anthropology, Child abuse, Fractures, Fall experiments, Anatomy **151**, 187

Skull; Forensic sciences, Forensic anthropology, Human identification, Roberto Gomensoro Josman, Photo-skull comparison, Digital video superimposition, DNA test, Uruguayan dictatorial regime **151**, 213

Social isolation; Skeleton, Forensic pathology, Forensic anthropology, Forensic odontology, Forensic entomology, Multidisciplinary **151**, 259

Soil density; Probe, Douglas Owsley, Geoscience, Forensic, Remote sensing **151**, 207

Solubility in beverages; Sedating drugs **151**, 171

Somali; Y-chromosome STR, Haplotype, Population genetics **151**, 317

Sorting techniques; Taphonomy, Forensic case, Africa, Skeletal remains **151**, 201

SPME; Propane, Head-space GC, Blood, Partition coefficient **151**, 165

Spot-test reagents; Ecstasy, Ketamine, Pills, Pill-testing kits, Rave **151**, 53

STR megaplex typing; Ancient DNA, Tooth, PCR inhibitors **151**, 31

STR; Allele frequencies, Forensic, Mexico **151**, 97

STR; AmpFℓ STR® Identifiler™, Jilin, China Han population **151**, 293

STR; Forensics, Genotyping, Allele frequencies, Population differences **151**, 315

STR; Y chromosome, Haplotypes, Colombia, Forensic genetics, Population genetics **151**, 307

Streptococcus; Forensic science, Forensic radiology, Virtopsy®, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Pneumonia **151**, 157

STRs; Forensic marker systems, Forensic database, Sub-population structure, CODIS **151**, 59

Sub-population structure; Forensic marker systems, Forensic database, STRs, CODIS **151**, 59

Syndrome; Injury, Infant, Shaken, Baby, Rotational, Acceleration/Deceleration, Neck **151**, 71

Talus; Articular surfaces, Calcaneus, New Zealand Polynesians, Discriminant analysis, Sex assessment **151**, 19

Tanzania; Human immunodeficiency virus, Acquired immunodeficiency syndrome, Neuropathology, Forensic autopsy **151**, 133

Taphonomy; Sorting techniques, Forensic case, Africa, Skeletal remains **151**, 201

Thickness; X-ray fluorescence, Hand-held spectrometer, Shield, Metal, Alloy, Poison **151**, 267

Tiger; Microsatellite, *Panthera tigris*, Individualization **151**, 45

Tissue concentrations; Arsenic, Massive poisoning, Post-mortem findings **151**, 273

Tissue preservation; DNA analysis, Disaster identification, Typifix™ **151**, 233

Tooth; Ancient DNA, PCR inhibitors, STR megaplex typing **151**, 31

Traceability; Pig, Single nucleotide polymorphism **151**, 239

Traffic accident; Forensic toxicology, Driving, Alcohol, Drugs **151**, 11

Trauma; Road accidents, Pedestrians, Drivers **151**, 151

Typifix™; DNA analysis, Tissue preservation, Disaster identification **151**, 233

Uruguayan dictatorial regime; Forensic sciences, Forensic anthropology, Skull, Human identification, Roberto Gomensoro Josman, Photo-skull comparison, Digital video superimposition, DNA test **151**, 213

Validation; Forensic science, DNA typing, Short tandem repeat (STR), Y chromosome, Polymerase chain reaction (PCR), PowerPlex, European minimal haplotype **151**, 111

Virtopsy®; Forensic science, Forensic radiology, Virtual autopsy, Non-invasive autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Virtual autopsy; Forensic science, Forensic radiology, Virtopsy®, Non-invasive autopsy, Postmortem imaging, Computed tomography, Magnetic resonance imaging, Imaging autopsy, Pneumonia, Streptococcus **151**, 157

Vitreous humor; Estimation of the time since death, Postmortem chemistry, Potassium, Hypoxanthine, Immunohistochemistry, DNA degradation, Magnetic resonance spectroscopy, Capillary electrophoresis **151**, 139

Weathering; Hair, Electron microscope, Cuticle, Cortex, Medulla **151**, 193

Widmark formula; Alcohol pharmacokinetics, Blood alcohol concentration (BAC), Hip-flask defence, Peak BAC **151**, 23

X-chromosome STRs; Poland, Forensic genetics, Population genetics **151**, 93

X-ray diffraction; Forensic science, Fibers, Copolymers, Acrylics, Polyacrylonitrile, Infrared spectroscopy, Crystallinity **151**, 125

X-ray fluorescence; Hand-held spectrometer, Shield, Thickness, Metal, Alloy, Poison **151**, 267

Y chromosome; Forensic science, DNA typing, Short tandem repeat (STR), Polymerase chain reaction (PCR), Validation, PowerPlex, European minimal haplotype **151**, 111

Y chromosome; STR, Haplotypes, Colombia, Forensic genetics, Population genetics **151**, 307

Y-chromosome STR; Haplotype, Population genetics, Somali **151**, 317

Y-chromosome; Short tandem repeats, Population data, Colombia **151**, 85
